This is a simple example on how to use Rnw files. At one time, the phrase, You've got mail, was a welcomed, even exciting notification. Our inboxes were usually empty, so we eagerly anticipated the arrival of ... Read More.

Here's a table displayed with the R package "xtable"

Example of a code chunk:

```
# two vectors
x <- 1:10
y <- x*2 + 5
```

Here's an example of inline code chunk using `\Sexpr{}`: the mean value of y is 16, the median of y is 16, and its length is 10

More lines

```
plot(x, y)
```
